

SkyDive

Salesforce, AI and data solutions built for real operating needs. Strategic advice and practical delivery from Dr Maren David Dangut Ph.D.

Company SkyDive Technologies and Consultancy Ltd Registered in England and Wales	Company number 15086660	Location Milton Keynes, UK
---	-----------------------------------	--------------------------------------

Core Capability

Salesforce engineering and architecture	Apex, Lightning Web Components, Flow, secure data models, platform architecture, code review and maintainable implementation support.
AI and data solutions	Agentforce, Einstein AI, Prompt Builder, Data Cloud/Data 360, machine-learning workflow design, governance and responsible AI guardrails.
Systems integration	REST, SOAP, GraphQL, Platform Events, Change Data Capture, identity controls, API mapping and reliable data synchronisation.
Technical leadership and delivery	Discovery, architecture governance, DevOps, mentoring, delivery assurance and senior stakeholder translation.

Where SkyDive Fits

- Salesforce programmes needing senior hands-on engineering and architecture review.
- Public sector, education, research and partner organisations improving connected digital services.
- Teams exploring practical AI and data workflows with governance, integration and adoption in mind.
- Delivery teams that need objective advice, technical mentoring or recovery support.

Typical Outputs

Discovery and advisory Option appraisals, risk reviews, architecture notes, operating model recommendations.	Build and improve Salesforce components, automation, integrations, data workflows and implementation documentation.
Assurance Code review, governance checks, release recommendations and maintainability guidance.	Enablement Workshops, mentoring, handover notes and practical team guidance.

Selected Technologies

Sales Cloud, Service Cloud, Experience Cloud, Data Cloud/Data 360, CPQ, Agentforce, Einstein AI, Apex, Lightning Web Components, Flow, SOQL, REST, GraphQL, Platform Events, Salesforce DX, Python, machine learning and CI/CD.
